

Parasite Glossary

Humans can host over 100 different types of parasites. Here are some of the most common parasites found in man.

Hookworm:

Hookworms attach themselves to the intestinal wall using buccal capsule teeth. At maturity a Hookworm may lay more than 30,000 eggs a day.

Tapeworm:

Tapeworms are a type of flatworm that can colonize animal and human digestive tracts.

Heartworm:

The adult worms are large, measuring up to 10 inches long, and they typically live in the right heart and pulmonary artery.

Roundworm:

Its mouth consists of three, independent lips, each equipped with small piercing projections.

Protozoa: Perhaps the most common parasite
Amoeba: Several species are commonly found in man.
Giardia: Swimmers are very susceptible to Giardia.
Toxoplasmosis: Effects 35% of the U.S. public

Para Cleanse™ - & - Colon Booster™

Don't let what you can't see hurt you!

Para Cleanse™ and Colon Booster™

ARE DISTRIBUTED BY:

“Fish and game and other meats can be contaminated with bacteria, viruses or parasites that can cause illness...”

**The New York Department of Health
Health Advisories
Chemicals in Sport Fish and Game 2003-2004**

Why Para Cleanse?

The "Black Plague" ravaged Medieval Europe and killed 25 million people in just 5 years (1347 to 1352). The "Plague" was caused by a single cell parasite called Yersinia Pestis. You've heard the children's rhyme, "Ring around the rosy (sign of the plague on the skin) pocket full of Posies (to hide the sent of death), ashes, ashes, (the corpses had to be burned) we all fall down (everyone died)!"

There were 2 forms of "Plague", Bubonic Plague (death rate, 30-75%) & Pneumonic Plague (death rate 90-95%). Spread to humans by the Oriental Rat Flea, it took 1-7 days for plague signs to become visible. Death came 24 hours later.

Today microscopic parasitic organisms invade our bodies either by contact on the skin or via oral ingestion. A parasite derives its food and nutrition from you the host. Toxoplasmosis can easily be spread from cats to humans and is carried by 40% of all cats and 35% of the U.S. population. As per Science News by J. Raloff.

It's important to periodically rid the body of parasites.

Parasitic Infestation of the Body

Intestinal Fluke

Are Parasites Present in Your Body?

- 1) Have you been bitten by mosquitos?
- 2) Bloated, grumpy or gassy after meals?
- 3) Always hungry?
- 4) Drank stream or river water?
- 5) Face licked by a cat or dog?
- 6) Eaten at a Sushi bar?
- 7) Eaten at a salad bar or buffet?
- 8) Abdominal, uterine or leg cramps?
- 9) Eaten food off the floor?
- 10) Pains in the abdomen?
- 11) Sinus problems?
- 12) Constipation and or diarrhea?
- 13) Restless or rough sleep?
- 14) Crave sugar, sweets or breads?
- 15) Swam in the ocean, lake or water skied?
- 16) Had Parasites before?
- 17) Experience anal itching?
- 18) Frequent yeast infections?

Check your total POSITIVE responses below:

- 0-2 Unlikely unless you answered yes to either #1, 4, 5, 6, 7, 9, 15 or 16.
- 3-5 Extremely high probability.
- 6+ Without question.

How to use Para Cleanse™ & Colon Booster™

Instructions for Use

Take 2-3 Para Cleanse and 1-2 Colon Booster at breakfast and bedtime, 6 days a week. Use the two formulas 3 weeks a month, for 3 months.

For more severe parasites, the two formulas may be taken up to 3 times a day or as advised by your doctor.

Herbs in Para Cleanse™

- | | |
|---------------------------|-----------------------------|
| China Bark | Shield Fern |
| Black Walnut Hulls | Quassia Bark |
| Pumpkin Seed | Chinese Wolfbane |
| Fedegoso | Petroselinum Cripsum |
| Grapefruit Seed | Wormwood |
| Garlic | Cayenne |
| Cloves | |

Herbs in Colon Booster™

- | | |
|-------------------------|-----------------------------|
| Fedegoso | Aloe Ferox |
| Rhubarb Root | Black Sesame Seed |
| Plum Seed Powder | African Bird Peppers |
